# FALL FURNACE MAINTENANCE

## CHECKLIST

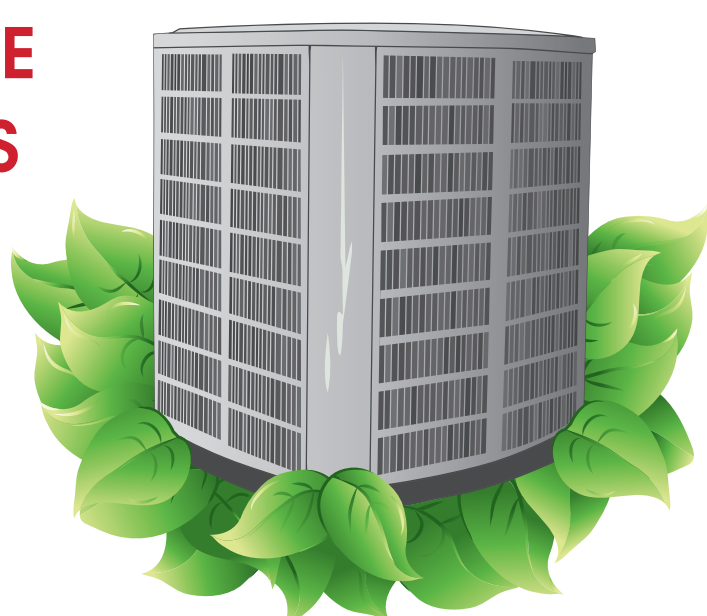

Getting your California home ready for colder weather? Don't forget about your heating system! Here's a handy checklist to ensure your home will be comfortable and affordable to heat this winter.

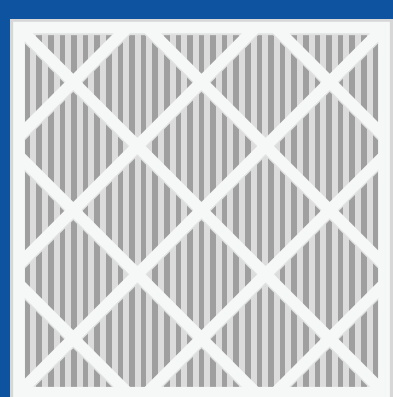

### CHECK YOUR FURNACE FOR STRANGE SOUNDS OR SMELLS

Don't wait until you really need it to turn your furnace on for the first time! Give your system a test run ahead of time and if you notice anything that doesn't seem right, call in the pros!

**TEST RUN YOUR FURNACE**

### CHANGE YOUR FURNACE AIR FILTERS

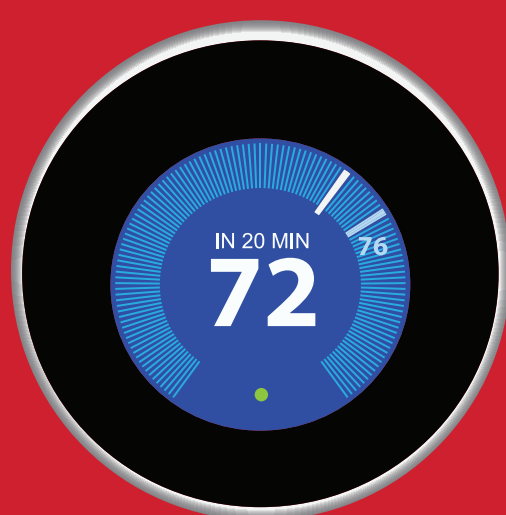

Your HVAC system's air filter removes dirt, dust, and other unwanted air particulates but it needs to be replaced regularly or it can become clogged and harm furnace performance.

**CHECK AND/OR REPLACE AIR FILTER**

### TEST YOUR THERMOSTAT

Some heating issues are actually just problems with the thermostat. Similar to testing your furnace, make sure you're able to properly adjust your home's comfort settings ahead of time.

**CONFIRM THERMOSTAT IS WORKING**

### SCHEDULE A PRECISION FURNACE TUNE-UP WITH GREINER

A furnace maintenance visit is one of the smartest things you can schedule this fall! Our expert technicians will help ensure you'll have reliable heating all winter long.

**SCHEDULE A TUNE-UP WITH GREINER**
